PROJECT REPORT: LegalEase AI

Student Name: Lavanya

Project Title: LegalEase AI - Legal Document Generator

Technology Stack: Python, FastAPI, Streamlit, Google Gemini API, ReportLab

1. Project Overview

LegalEase AI is an AI-powered legal document generation system designed to simplify the creation of legal agreements such as House Rental Agreements and NDAs. By combining a FastAPI backend powered by the Gemini API with a clean Streamlit interface, users can generate structured legal text and seamlessly export it into professional PDF files using ReportLab.

2. System Implementation & Execution

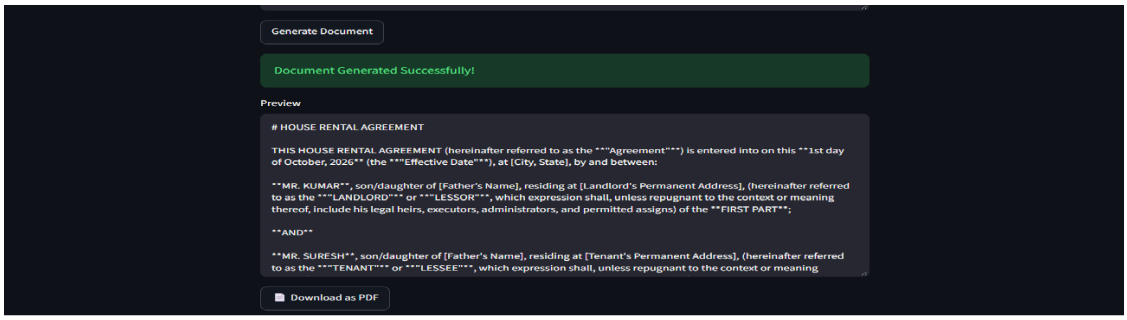

Figure 1: Streamlit User Interface & Input Form

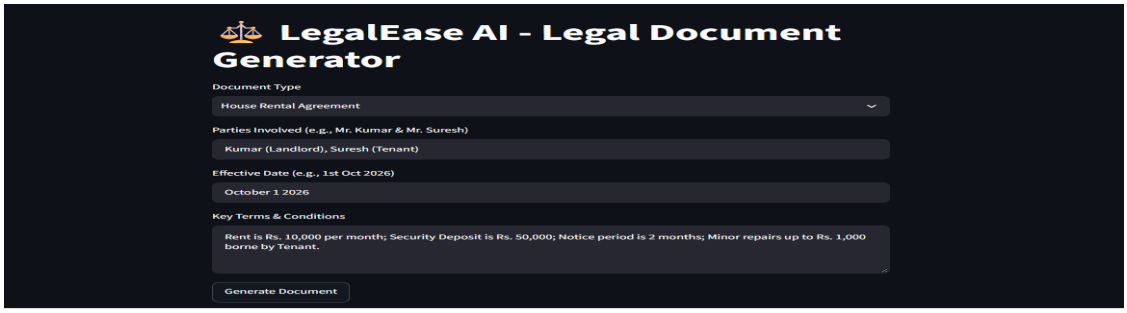

Figure 2: AI Document Generation & Download PDF Option

Figure 3: Downloaded House Rental Agreement PDF Output

3. Conclusion

The application successfully automates legal document drafting and exports clean, downloadable PDFs with appropriate structure and formatting.
